User profile for volunteer group. They can edit by pressing the Edit button at top right

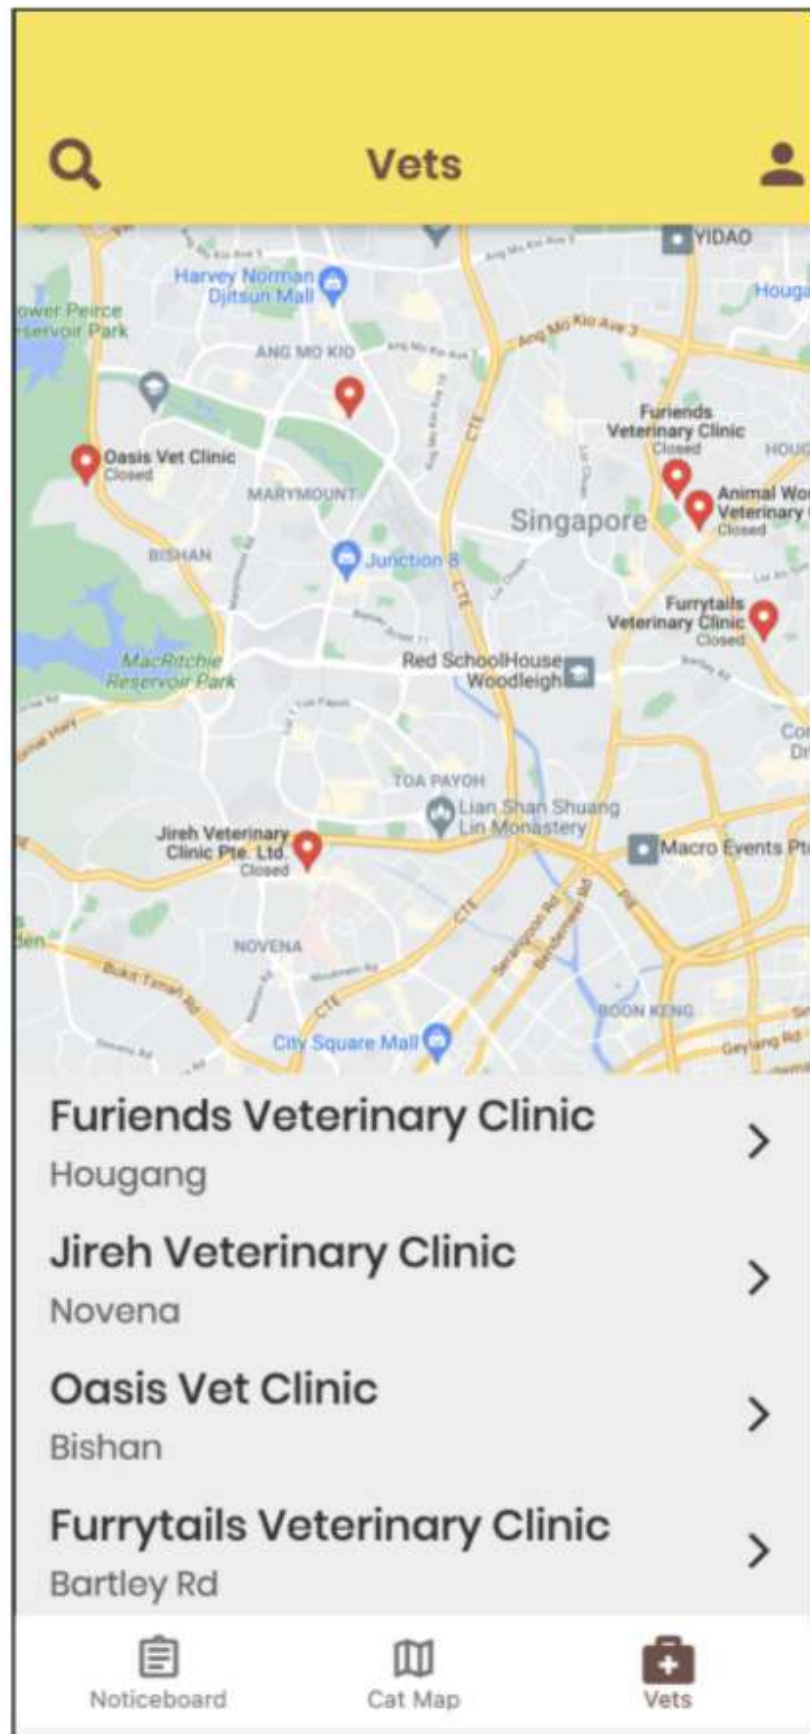

The Noticeboard allows users(volunteers) to view a list of injured stray cats which were reported by users(passerby) and have not been tended to yet. The user(volunteer) is able to view the location of the injured cat, contact details of user(passerby) who reported the injury and a description of the injury. Should a user(volunteer) want to tend to a case, he/she may click on the "handle" button to do so.

When the volunteer clicks on a particular injured cat, the location of the cat (including the details) are displayed on the map. Volunteer groups can then refer to this when identifying where the selected injured cat is located

When a volunteer clicks on the 'cat map' option, all the cats (injured or not) are displayed for viewing. If a particular cat marker on the map is clicked, the details of the cat (including the last seen time) is available.

When the vet option is clicked, an automatic response of the 5 closest vet options from your current location are displayed. (This is for volunteers)

Report

Please upload a picture of the stray cat you have found.

 Take a Photo

 Upload a Photo

Report

Adopt

Vets

Prompt for user(passerby) to take/upload a photo of the stray cat they have found.

Report

Adopt

Vets

After a passerby uploads the image, the system will try to identify the breed of the cat, and fetch all cats of the same breed in our database. If the passerby identify the same cat in our database, he/she can continue reporting that cat; if the cat is not yet stored in database, the system will open a new record of the cat

 **Report**

Please give a name to the cat that you have found!

NAME:

CONFIRM NAME

 Report  Adopt  Vets

Prompt for user(passerby) to provide a name (for future identification) of the stray cat they have found which DO NOT currently exist within the database.

Report

You Found Benson!

Is the cat injured?

Report

Adopt

Vets

If there is a match between the reported stray cat and a stray cat from the database, the cat's name and photo is displayed along with a prompt for the user(passerby) to confirm if the cat is injured or not.

Report

Please send a picture of the injury:

Describe the injury:

(Optional)

Large gray rectangular area for describing the injury.

Continue

Report

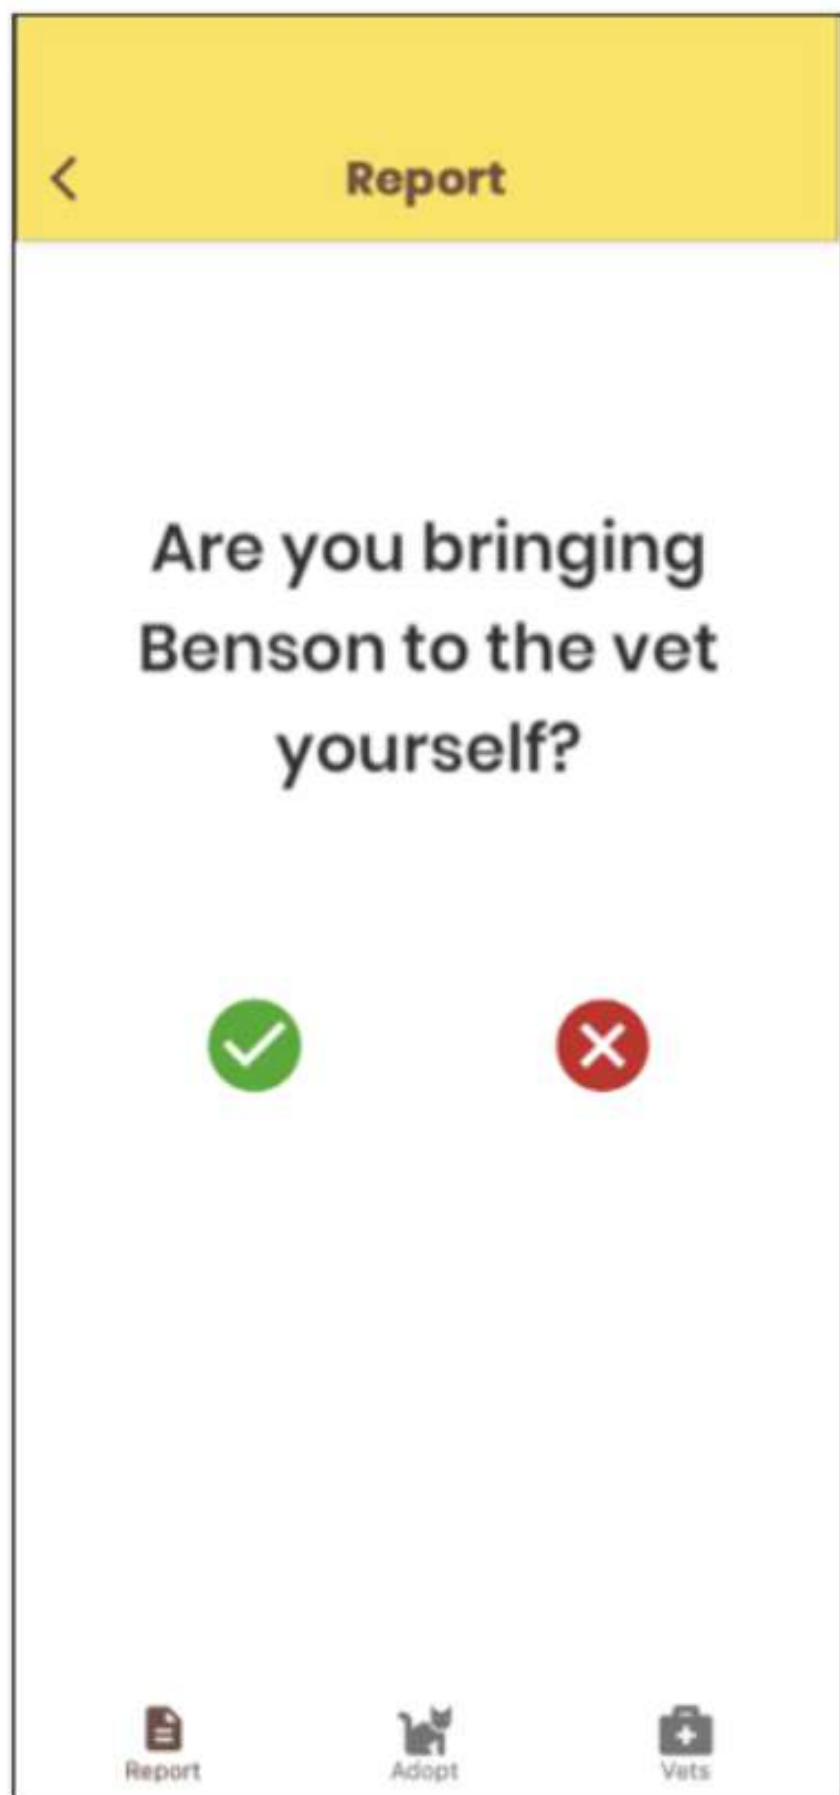

Adopt

Vets

This page is displayed when the passerby identifies an injury on the act and wants to alert volunteer groups. It is compulsory to post a picture, and the description is optional.

Message which prompts user(passerby) to confirm if he/she is going to bring the injured stray cat to the nearest vet clinic.

Report

Please leave your name and contact details so that we can hand over your case to a volunteer

Message after successfully
reporting a stray cat case

Users(passerby) who wish to adopt a cat may view a list of animal shelters which have stray cats up for adoption as well as the contact details of the animal shelters such as organisation name, email, contact number and address.

When the vet option is clicked, an automatic response of the 5 closest vet options from your current location are displayed. (This is for passerby)
